

We all love surprises, but not when it comes to our water bill.

Even though Council regularly checks for leaks on the street side of your water meter, it's your responsibility to make sure your property is in working order.

With the summer weather in full swing, now is the time to check in and around your home for those leaks that put a drain on your wallet.

24,000 LITRES PER DAY

is wasted through a single cracked water pipe – that's equivalent to 120 bathtubs.

1,000 LITRES PER HOUR

can be lost through an evaporative air conditioner – that's enough to fill 50 jerry cans.

One overflowing toilet has the potential to waste

1,000 LITRES PER DAY

which is enough to fill 500 watering cans.

MYSTERIOUS GREEN PATCHES?

Leaks on your property, particularly those underground, might not be obvious: that's why it's important to check your consumption levels.

One dripping tap has the potential to waste

20,000 LITRES PER YEAR

which is equivalent to 55 cartons of milk a day.

DON'T LET A LEAK RUIN YOUR WEEK
