\*Please note, the recycling of clean, contaminant free timber (not classed by the site supervisor as Construction & Demolition (C&D) Waste) and green waste is free for domestic users but attracts a fee for commercial users. This fee is significantly lower than the Commercial and Industrial (C&I) rate and covers the cost of mulching the material. Similarly there is a fee to process concrete and masonry (payable by both residents and commercial users) to cover costs of processing the stockpiled concrete.

# Appointment may be required.

\*\* Domestic green waste/timber only.
