### Table 9.3.2.1 - Extractive industry code

Proposed Solution					
Performance outcomes	Acceptable outcomes	Explanation of how the development addresses the Acceptable Outcome and/or Performance Outcome.			
For accepted, accepted subject to requirements ar	For accepted, accepted subject to requirements and assessable development (code, code (fast tracked) and impact)				
Buffers, separation and amenity					
<b>PO1</b> The effects of <i>Extractive industry</i> operations (dust, air and noise emissions, blasting, vibration and overpressure) and from associated transport movements do not create significant environmental harm or unreasonably disrupt the amenity of sensitive land uses or land identified for	<b>AO1.1</b> <i>Extractive industry</i> operations that involve blasting, crushing or screening are located with a minimum separation distance of 1,000 metres from a <i>sensitive land use</i> or land in a residential zone category.				
<ul> <li>future sensitive land uses.</li> <li>Note - to demonstrate compliance with this Performance</li> <li>Outcome, the following information will be required, which may include (but is not limited to):</li> <li>i. the term, extent, sequencing and nature of extraction proposed over the life of the operation;</li> </ul>	<b>AO1.2</b> <i>Extractive industry</i> operations that do not involve blasting, crushing or screening are located with a minimum separation distance of 200 metres from a <i>sensitive land use</i> or land in a residential zone category.				
<ul> <li>ii. the nature and frequency of blasting and measures to be taken to warn and protect</li> <li>the public when blasting is planned;</li> <li>iii. the type of vehicles and equipment involved both on and off the site;</li> <li>iv. measures to control air pollution and noise;</li> <li>v. the proximity and type of nearby <i>sensitive land uses</i> and</li> </ul>	<b>AO1.3</b> Haul routes, except those that involve a State- controlled Road or an existing rail line, are more than 100 metres from a <i>sensitive land use</i> or land in a residential zone category.				
receptors; Vi. likely haul routes, including a description of the environments through which they pass; and Vii.environmental nuisance report detailing weeds, dust, waste and noise mitigation measures.	<b>AO1.4</b> <i>Extractive industry</i> operations are located a minimum of 500 metres from a <i>Protected Area</i> .				

		REGIONAL COUNCIL
Performance outcomes	Acceptable outcomes	<b>Proposed Solution</b> Explanation of how the development addresses the Acceptable Outcome and/or Performance Outcome.
<ul> <li>PO2 Extractive industry buildings, machinery operating areas and access ways are to be located and effectively screened from public roads, public vantage points and neighbouring properties, in the protection of the prevailing visual character of the locality. Note- to demonstrate compliance with this Performance Outcome, adequate information on the methods to be employed to reduce visual impacts is required, which may include (but is not limited to): <ul> <li>i. locating exposed features behind natural barriers;</li> <li>ii. constructing amenity banks and vegetation screens;</li> <li>iii. carrying out timely rehabilitation works;</li> <li>iv. minimising signage;</li> <li>v. construct and paint buildings and facilities using materials and colours existing in the landscape;</li> <li>vi. limit and contain security and night lighting within the site;</li> <li>vii. align access and haulage roads to prevent direct views into the site.</li> </ul> </li> </ul>	AO2 No acceptable outcome.	
Hours of operation		
<b>PO3</b> <i>Extractive industry</i> occurs at times that will not result in disturbance of <i>sensitive land uses</i> .	<b>AO3.1</b> Blasting operations are limited to between the hours of 9.00am to 5.00pm Monday to Friday.	
	<ul> <li>AO3.2</li> <li>Extraction, crushing, screening, loading haulage and the operation or maintenance of plant equipment and vehicles are only to be undertaken between the hours of:</li> <li>(a) 6.00am and 6.00pm Monday to Friday; and</li> <li>(b) 8.00am and 2.00pm on Saturdays.</li> </ul>	

		REGIONAL COUNCI
Performance outcomes	Acceptable outcomes	<b>Proposed Solution</b> Explanation of how the development addresses the Acceptable Outcome and/or Performance Outcome.
	<b>AO3.3</b> No <i>Extractive industry</i> operations are conducted on a Sunday or public holiday.	
Managing the effects of Extractive Industry operat	ions	
<ul> <li>PO4</li> <li>Water run-off from the site is managed so as not to adversely affect the quality of adjoining and downstream waterways or groundwater, minimise erosion, and does not create any worsening of the quality and quantity of water discharged from the site onto or towards any other land, including roads.</li> <li>Note- to demonstrate compliance with this Performance Outcome, the following information is required, which may include (but is not limited to): <ol> <li>Site levels before, during and after excavation works;</li> <li>the location and description of potentially affected waters, including waterways, wetlands and groundwater;</li> <li>erosion and sediment control;</li> </ol> </li> <li>means used to prevent downstream contamination caused by the storage, maintenance and operation of machinery and equipment (e.g. bunding, spill cleanup procedures); and</li> <li>means used to retain stormwater during significant rainfall events.</li> </ul>	AO4 No acceptable outcome.	
<ul> <li>PO5</li> <li><i>Extractive industry</i> operations minimise lighting impacts on roads, public vantage points and neighbouring properties by taking into consideration: <ul> <li>(a) illumination levels;</li> <li>(b) periods of illumination;</li> <li>(c) direction of lighting;</li> <li>(d) use of vegetation buffers;</li> <li>(e) proximity to <i>sensitive land uses</i>.</li> </ul> </li> </ul>	AO5 Fixed site lighting complies with Australian Standard AS4282 Control of the Obtrusive Effects of Outdoor Lighting.	

		REGIONAL COUNCIL
Performance outcomes	Acceptable outcomes	<b>Proposed Solution</b> Explanation of how the development addresses the Acceptable Outcome and/or Performance Outcome.
<ul> <li>PO6</li> <li>The haulage of extractive material does not result in the deterioration of roads used by ensuring: <ul> <li>(a) the roads used as haulage routes are of an adequate standard to accommodate the type and frequency of traffic generated;</li> <li>(b) haulage routes are maintained including the removal of dirt and other spillage from trucks; and</li> <li>(c) Haulage routes do not compromise traffic safety or amenity in the area.</li> </ul> </li> <li>Note- a road maintenance plan is required to demonstrate compliance with this Performance Outcome.</li> </ul>	AO6 No acceptable outcome.	
<b>PO7</b> Public access to the site is managed to protect the health and safety of the public.	<b>AO7.1</b> Suitable fencing is provided and maintained on the perimeter of the site.	
	<b>AO7.2</b> Warning signs are to be placed on the perimeter fence where access is obtained on any frontage to a public road.	
Landscaping and Rehabilitation		L
<b>PO8</b> Landscaping is utilised to screen operational areas, and complement the biodiversity values of the surrounding area.	AO8 No acceptable outcome.	
<ul> <li>Note- landscaping incorporates the following elements where appropriate: <ol> <li>native plants of local origin;</li> <li>known food and habitat trees and shrubs;</li> </ol> </li> <li>replication of adjacent healthy remnant habitats, including understorey vegetation; and</li> <li>no declared noxious plants, weeds or invasive plants likely to displace native flora species or degrade fauna habitat.</li> </ul>		

Performance outcomes	Acceptable outcomes	<b>Proposed Solution</b> Explanation of how the development addresses the Acceptable Outcome and/or Performance Outcome.
<b>PO9</b> Progressive rehabilitation of the site is to be carried out over the life of the <i>Extractive industry</i> operations to minimise the potential for impacts on the environment and to retain the environmental values and natural appearance of the surroundings.	AO9 No acceptable outcome.
