Planning, Building and Plumbing Applications

Waiver of Planning, Building and Plumbing Applications Fee

The Planning & Environment Manager has delegated authority to determine to partially or wholly waive a planning, building or plumbing application / request fee where a strict application of the scheduled fee does not reasonably reflect the cost of assessment for the type of development application / request.

Refunds - Planning Applications

Any request to refund a development application fee, must be made in writing prior to deciding the application. A refund will be given depending on the stage the application is in at the time of withdrawal as follows:

- Part 1 (Application): 75%
- Part 2 (Referral) and Part 3 (Information): 50%
- Part 4 (Notification): 25%
- Part 5 (Decision): No refund is applicable.

If an application is subject to compliance action or lapses during the Development Application process, no refund is payable.

If a Referral Agency Response is withdrawn before it is decided, a refund will be given depending on the application stage at the time of withdrawal as follows:

- Referral Confirmation Period: 75%
- Any time after the Referral Confirmation Period: 50%

If an application is subject to compliance action or lapses during the Development Application process, no refund is payable.

Where a Material Change of use or Reconfiguring a Lot application has an agreed pre-lodgement meeting outcome, no request for information is issued and there is no applicant appeal, a 40% refund is available.

Refunds - Building Applications

Any request to refund a building application fee, must be made in writing prior to deciding the application. A refund will be given depending on the progress of the application at the time of withdrawal as follows:

- No assessment work being commenced by Council's building certifier: 75%
- No inspections being undertaken: 40%
- If an application lapses during the Development Application process, no refund is payable.

Re-Submission of a Lapsed Approval

Where the currency period of an approval has lapsed, and a development application is:

- resubmitted within 6 months of the approval lapsing, and
- the proposal is generally in accordance with the former approved plans, and
- there has been no change to the Planning Scheme provisions, the applicable fee will be 75% of the applicable current fee.

Council will not accept the re-submission of a lapsed approval more than once.

Name	Year 2026/27 Fee (Including GST)	Legislative Reference	GST	Fee Type
------	---	-----------------------	-----	----------

Re-Submission of a Lapsed Application

Where a development application has lapsed, and a new development application is:

- resubmitted within 6 months of the application lapsing, and
- the proposal is generally in accordance with the former proposal, and
- there has been no change to the Planning Scheme provisions or relevant legislation, the applicable fee will be 75% of the applicable current fee.

Council will not accept the re-submission of a lapsed application more than once.

Preliminary Approvals

Any application made for a preliminary approval defined in accordance with Section 49(2) of the Planning Act 2016 is subject to a fee of 75% of the fee applicable to a request for a Development Permit. A subsequent Development Permit sought for development on land where the proposed development is in accordance with preliminary approval, is subject to 75% of the applicable current fee.

Variation Approvals

Any application made for a variation approval defined in accordance with Schedule 2 of the Planning Act 2016 is subject to a fee of 125% of the fee applicable to a request for a Development Permit. A subsequent Development Permit sought for development on land where the proposed development is in accordance with preliminary approval, is subject to 75% of the applicable current fee.

Combined Applications

Fees for a combined application are to be the sum of those fees that would have been required in the event of a separate development application being lodged for each type (e.g. Material Change of Use, Reconfiguration of a Lot, Building Work and Operational Work).

Multiple Reconfiguring a Lot Types

Where an application involves more than one Reconfiguring a Lot type (e.g. Reconfiguring a Lot and an Access Easement), then the fee is to be based on the highest value Reconfiguring a Lot fee that applies.

Multiple Land Uses

Where an application involves more than one type of land use (Material Change of Use) over one lot, or multiple instances of the same use over one lot, then the fee is to be based on the highest land use fee plus 75% of the fee for each additional land use and additional instance of the same use proposed as part of the application.

Undefined Use/ Unusual Circumstances

Where an application involves a use not specifically provided for in the planning scheme and the use or application could not reasonably be included in a category that is provided in the Schedule of Fees, the Planning & Environment Manager shall assess the relevant fee. This fee is to be based on an estimated fee to cover the actual cost for Council to cover the assessment and determination of the application.

Change Application (Other Change)

Where making an Other Change to a Development Approval, the fee is calculated for the aspect of the Other Change as if it were a new application.

Flood Impact Assessment

Where a proposed development is required to be run through Council's flood model, Council engages Water Technology on behalf of the applicant to run a proposed development through the flood model. The fee is POA plus a Council administrative fee of 20% of the cost of the flood assessment or \$1,731, whichever is the lesser.

Name	Year 2026/27 Fee (Including GST)	Legislative Reference	GST	Fee Type
